TECHNOLOGIES

Backend

Python · Django · DRF · JWT · REST APIs

Frontend

Vue 3 · TypeScript · JavaScript · React · Tailwind · Vite · HTML5 / CSS3 · PWA

Mobile

Android · Kotlin · WebView · Android Studio · Play Console

Data

PostgreSQL · MySQL · SQLite · PocketBase · JSON

Quality & DevOps

Testing (Django, Vitest, Pester) · Selenium · GitHub Actions · Git · PowerShell · Netlify · Vercel

AI-assisted development

Claude Code · OpenCode · Ollama · AGENTS.md / CLAUDE.md · Spec-Driven Dev

Methodologies

User stories · UML · Pull Requests · Roadmaps · Documentation

LANGUAGES

Spanish	Native
English	A2 (not certified)

STRENGTHS

- Self-learning and product leadership
- Responsibility and adaptability
- Teamwork and customer service
- Attention to detail and logic

PROFILE

Full stack developer who ships complete products: **REST APIs with Django**, front ends with **Vue 3 + TypeScript** and **Android apps in Kotlin**. Software Development Technologist (SENA) in the work-placement stage, with freelance back-end experience. I work daily with **Claude Code** in an AI-assisted development workflow, and I validate everything it produces with tests, Pull Requests and continuous integration.

AI-ASSISTED DEVELOPMENT

LEVEL WITH CLAUDE **Upper-intermediate** · as a development tool

- Daily use of **Claude Code** and OpenCode to plan from specs, write code, refactor, test and document.
- I designed an **agent harness** (AGENTS.md, CLAUDE.md, memory) that gives the AI the context and rules of each repository.
- I validate every AI contribution with **tests and Pull Requests** before merging it; Ollama for local models.

PROJECTS

REAL PRODUCT · LIVE

Ondas del Orteguaza — Online radio station

ondas-del-orteguaza.netlify.app

HTML5 · CSS3 · JavaScript · JSON · PWA · Netlify · Zeno.fm · Kotlin · Android

- LIVE: **Website + PWA**
- GOOGLE PLAY: **Native app v2.0.2 (Kotlin)**

- I lead it end to end, from the approved proposal to Google Play; content lives in a remote JSON and updates without a new release.

MedAlert — Medications and appointments

github.com/Carlos-j24/MedAlert

Django REST · JWT · Vue 3 · TypeScript · Tailwind · Vitest · GitHub Actions

- App for caregivers with WhatsApp alerts, a PDF per patient and a REST API with JWT and rate limiting.
- **71 tests** (47 Django, 24 Vitest) in CI with GitHub Actions; user stories and UML.

DevForge — AI-powered dev environment

github.com/Carlos-j24/DevForge

PowerShell 7 · Pester · GitHub Actions · Spec-Driven Development

- Doctor checks the environment without installing anything; Init sets up the AI harness for the stack.
- **116 tests** with Pester (PowerShell 7 and 5.1) on every Pull Request.

Diapasón — Tablature editor with synchronized sheet music

in progress

Vue 3 · TypeScript · Vite · Django

EXPERIENCE

Python Backend Developer

Hostpal (freelance) · May – Jun 2023

- Automated Python tasks to process client and property data; managed databases, migrations and code review.

EDUCATION

Software Development Technologist

SENA · 2024 – present (work placement)

Oracle Next Education — Cohort 5

Oracle + Alura Latam · 2023 · 326 h

Software Development (web focus)

U. Sergio Arboleda · Colombian Ministry of ICT · 2021 – 2022
