TECH STACK

Backend

Python, Django, Django REST Framework, JWT, REST APIs

Frontend

Vue 3, TypeScript, JavaScript, React, Tailwind CSS, Vite, HTML5 / CSS3

Data

PostgreSQL, MySQL, SQLite, PocketBase

Quality & DevOps

Automated testing (Django, Vitest, Pester), Selenium, GitHub Actions, Git / GitHub, PowerShell

Methods

User stories, requirements, UML, Pull Requests, spec-driven development, technical documentation

LANGUAGES

- Spanish — Native
- English — A2 (not certified)

STRENGTHS

Self-directed learning · Responsibility · Adaptability · Teamwork · Attention to detail · Logical thinking · Customer service

PROFILE

Full stack developer focused on Python / Django on the back end and Vue 3 + TypeScript on the front end. Software Analysis and Development Technologist (SENA) in the work-placement stage, with freelance back-end experience. I build complete web applications —REST APIs, interfaces, tests and documentation— and look after quality with Pull Requests and continuous integration.

EXPERIENCE

Python Backend Developer · Hostpal (freelance) May – Jun 2023

- Built and automated Python tasks to process client and property data.
- Managed databases and helped integrate and migrate information between platforms.
- Verified code, applied good practices and analyzed technical solutions as part of a team.

PROJECTS

MedAlert — Medications, reminders and medical appointments
Django REST · JWT · Vue 3 · TypeScript · Tailwind · Vitest · ReportLab · GitHub Actions

- Full stack web app for caregivers: patients, medications, reminders and appointments, with WhatsApp alerts and a PDF per patient.
- REST API with JWT, rate limiting and data isolation between caregivers; Vue 3 + TypeScript front end.
- 71 tests (47 in Django, 24 with Vitest) in CI with GitHub Actions; user stories, UML and Pull Requests.

portafolio-goap.vercel.app/projects/medalert · github.com/Carlos-j24/MedAlert

DevForge — AI-assisted development environment
PowerShell 7 · Pester · GitHub Actions · Spec-Driven Development

- Doctor: checks Git, Python, Node.js, Docker, VS Code and Ollama without installing anything (console or JSON).
- Init: installs an AI harness (AGENTS.md, CLAUDE.md, MEMORY.md) in other projects based on their stack.
- 116 Pester tests on PowerShell 7 and 5.1, on every Pull Request with GitHub Actions.

portafolio-goap.vercel.app/projects/devforge · github.com/Carlos-j24/DevForge

Diapasón — From tablature to sheet music In progress
Vue 3 · TypeScript · Vite · Django · HTML5 / CSS3

- Web tablature editor with synchronized sheet music and a music engine (duration and rhythm) covered by tests.

EDUCATION

Software Analysis and Development Technologist Sep 2024 – present
SENA · Work-placement stage

Oracle Next Education (ONE) — Cohort 5 Mar – Sep 2023
Oracle + Alura Latam · 6 tracks, 326 h (front end, JavaScript and React)

Software Development with a focus on web applications May 2021 – Dec 2022
Universidad Sergio Arboleda · Colombian Ministry of ICT program
